Domissima, a Greek company with international experience and know-how, manufactures innovative state-of-the-art products and applies integrated technical solutions in the fields of waterproofing, structural repair, construction & floor protection, as well as decorative coatings. Ever since 1971, when it was founded by Christos Nanopoulos, Domissima implements highly demanding public and private sector projects. Until today, Domissima has already implemented more than 15,500,000 sqm of applications in Greece and the Balkans.

Utilizing **50 years of experience** in construction, the know-how of their leading Swiss chemical partners and by investing in an efficient R&D department, Domissima produces pioneering, specialized new generation chemical building materials and constantly develops new innovative products. Simultaneously, as a strategic partner of the multinational group Soprema, introduces a wide range of products, emphasizing on environmental protection. Domissima distributes products in Greece and overseas, providing complete and integrated technical support to customers and partners.

**We invest in** ● Research and development (R&D) ● Human resources ● Unceasing training ● Strong international collaborations and relationships ● New commercial presence of the company in the global market ● New facilities, equipment, machinery ● Production line agility

Factory facilities with modernly equipped laboratories and fully automated production and packaging systems, offices, warehouses and seminar rooms.

# PRODUCTS

■ WATERPROOFING

■ REPAIR

■ PROTECT

Domissima utilizes the know-how from major construction projects, the scientific research in collaboration with the leading Swiss company Serena Bauchemie, as well as the experience from long-term cooperations with international corporations and develops innovative, pioneering high quality and special specifications products.

- WATERPROOFING (coatings-liquid membranes & cementitious coatings, waterproofing primer, waterproofing reinforcement)
- REPAIR (repairing mortars, mortar admixtures, repairing primer)
- PROTECTION (thermal insulation products, protective paints, special paints, varnishes)
- FLOOR PROTECTION (epoxy, epoxy primers)
- DECORATIVE COATING (microcement mortar)

Domissima's chemical building materials are available from a wide network of specialized partners in Greece and from selected partners, local distributors and subsidiaries in the European and international market (United Kingdom, Spain, Italy, France, Portugal, Morocco, Romania, Bulgaria, Serbia, North Macedonia, Cyprus and more)

TEXSA.  
NOVAGLASS.  
SERENA  
BAUCHEMIE.

DOMOLASTIC

Domissima identifies and imports exclusively for the Greek market advanced systems and products, in order to offer creative and integrated solutions in construction:

- Asphalt & synthetic membranes
- Special primers

While exporting high-quality products to the global Soprema network:

- Polyurethane products
- Cementitious products
- Primers and varnishes
- Paints

# RESEARCH

# +

# ISO

# 9001:2008

# DEVELOPMENT

**Research & Development** ● Domissima R&D department was founded in collaboration with the leading Swiss scientist Robert Serena of Serena Bauchemie. Our initial goal was the development, evolution and quality differentiation of the products we produce. Today, Domissima possess three state-of-the-art laboratories and a great team of trained chemical engineers who design, research and test new products according to the strict requirements of the international market, meeting the needs of any modern construction.

**Quality policy** ● The quality assurance procedures of Domissima services, products and projects have been certified by the International Organization DEDAL. The company implements the quality systems ISO 9001: 2008 and Factory Production Control – FPC.

# HUMAN RESOURCES

**Human Resources** ● At Domissima, our human resources are an important asset and a strong competitive advantage. We invest systematically in the selection, training, evaluation and development of our people. Concurrently, we support our partners - craftsmen, applicators - through training activities and technical support services.

# SUPPORT

**Technical Support** ● Having as keystone our 50 years of know-how, we design and propose complete, specialized, creative technical solutions and application systems for any construction project. At the same time, we ensure the successful implementation of each project with Domissima chemical building materials, offering our partners continuous technical support through product application and technical solutions providing seminars.
