## COMPOSITION

Synthetic liner of TPO modified polyolefin, in two-colour version (sand grey/black), obtained by co-extrusion, which allows to produce in a single layer a liner with different physical-chemical properties on the two sides by inserting a glass gauze as dimensional stabiliser.
The upper sand grey layer is characterised by very high resistance to weathering and ultraviolet rays, whereas the lower black layer is resistant to puncturing and ultraviolet rays.
Manufactured in UNI EN ISO 9001:2000 (Quality System) and UNI EN ISO 14001:2004 (Environmental System) certified plant. Laying by installers approved by Flag S.p.A. Finishing and accessories with elements manufactured and approved by Flag S.p.A.

## FEATURES

- Resistance to weathering and ultraviolet rays.
- Dimensional stability
- Will not rot
- Mechanical and puncturing resistance
- Adaptability to structural movements
- Flexibility to low temperatures
- Excellent weldability

## AREA OF USE

ROOFING

- Movable Ballast System:
- horizontal surfaces without pedestrian traffic ballasted by gravel
- horizontal surfaces with pedestrian traffic ballasted by prefabricated square concrete slabs
- inverted roof
- sandwich roof
- vertical details
- Rigid Ballast System:
- pedastrian roof
- trafficked roof
- roof-garden

## ACCESSORIES SYSTEM

- FLAGON TPO for detail work (FLAGON EP/S)
- Prefabbricated accessories (corners, rain water outlet ecc.)
- FLAGON TPO CLEANER
- FLEXOCOL TPO (for vertical surface)
- TPO Flagmetal sheet - perimeter profile - termination strip - strip

Due to its formulation, the liner is NOT subject to the requirements set forth in the EEC 79/831 regulation on dangerous substances. If the product should be disposed of as waste, we recommend sending it to an authorised landfill site or to an incinerator equipped with post-combustion chamber and fume washing system.
